Improvement

Theatres Recycling Project

OBJECTIVES

- Improve disposal of waste in theatres, reducing environmental impact and saving money.
- Change staff behavior towards recycling with education, training and measurement.

SOLUTIONS

The team undertook fundamentals of Improvement training to understand how to use Improvement methodology to achieve sustainable change. Work was carried out in collaboration with Veolia and Cardiff University as part of the Accelerate Programme. Engagement with staff helped to change behaviours and identify innovative materials and approaches.

BENEFITS

Benefits One

Environmental benefits contributing to CTM's commitment to achieving environmental sustainability in health care.

Benefits Two

The project spread from RGH to PCH and POW, increasing environmental awareness and savings across sites.

“Improvement underpins every process within healthcare in Theatres. We are always focussed on adopting and developing best practices to ensure full utilisation and efficiency of safe working and patient focused care. This project aims to change staff behaviour by demonstrating the impact of improved recycling behaviour.”

Craig Holley

Operating Department Practitioner
