Attend Anywhere Project

OBJECTIVES

Attend Anywhere is a web-based communication platform that allows video appointments to take place between patients and clinicians. These appointments can take place anywhere such as at work, school or home. Attend Anywhere is accessible via any type of device that has Internet access e.g. Smart Phone, Tablet, Laptop or Computer with a webcam, Running Chrome, Edge or Safari browsers to use it.

SOLUTION

Attend Anywhere revolutionises the access to care, especially for those with chronic disabilities, Attend Anywhere offers a secure virtual patient and clinician experience. Its free to access, safe and secure, confidential and anonymised. Comparable treatment, care and support as in an in person appointment in many ways.

BENEFITS

Benefits One

Safely treating patients through the pandemic also reducing the waiting lists. improves patient accessibility and choice

Benefits Two

Saves time on travel for both patient and clinicians and reduces carbon foot print. Reduces transport and travel difficulties. reduces time off work and other responsibilities.

Benefits Three

Reduces impact on your health and others, reduces the spread of infections.

*"The AA project supports specialties with the transformation of services, strengthening our digital offering whilst ensuring a safe and secure platform for patients to access their health care providers"
Please contact myself for and further information, guidance and support."*
