INFORM	<p>The Clinical Advisory Group (CAG) discussed examples of times where clinical teams felt decisions were made without their input and where they felt that they were the last to be informed. Communication within the Integrated Locality Groups (ILGs) is sometimes not optimized. Clinicians are keen to be asked for ideas regarding how aspects of care such as flow could be improved. An example was given about how community clinical teams are attempting to collaborate with local authority teams. The ongoing issues with social services capacity were acknowledged.</p> <p>The human aspect behind data and waiting lists is often lost and it is important for us all to be reminded of the patient stories behind the data and to try to capture the impact of delayed care as well as the figures.</p> <p>Bridgend clinical staff often still feel left behind. Issues raised include the digital integration of Bridgend ILG (BILG) which has already been discussed and is a top priority. There are also differences to the way clinical policies are applied and many Service Level Agreements (SLAs) continue to be a challenge. Bridgend staff are concerned that services may be "levelled down" to be in-line with those of the rest of CTM.</p> <p>CAG was updated on the Future Strategies work and will discuss this in more detail at the next CAG.</p>
