To design, develop, build and test an online platform called 'Olwen'. To scope out 10 – 15 key 'intents' based on FAQs in gynaecological cancers to be agreed by patients, carers, family members and clinical teams involved in cancer care. Intents will include variation in terms for both questions and answers to support NLP.

Phase 1:

1. Establish OLWEN Project Group
2. Establish User Input Group
3. Integrate Welsh language platform into OLWEN
4. Review RiTTA general cancer intents
5. Migrate RiTTA general cancer intents into OLWEN
6. Workshop 1 Scope new intents
7. Develop new intents
8. Workshop 2 playback session 1
9. Test phase I English

Phase 2:

10. Review and develop from test phase I English
11. Test phase I Welsh
12. Review and develop from test phase I Welsh
13. Facebook integration CTMUHB Phase II (deploy version 0.1)
14. Test phase II English and Welsh
15. Review and develop from test phase II
16. Deploy v.0.2
17. Discovery integration Phase III
18. Test phase III
19. Deploy v.0.3
