Key messages

Outcomes

Since we last reported on the National Fraud Initiative (NFI) in Wales in October 2020, outcomes valued at £6.5 million have been recorded. The cumulative total of outcomes from the NFI in Wales since NFI started in 1996 are now £49.4 million. Across the UK, the cumulative total of NFI outcomes is now £2.37 billion.

NFI outcomes in Wales decreased by £1.5 million to £6.5 million in the 2020-21 exercise. This was primarily because fewer ineligible claims for Council Tax Single Persons Discount and Housing Benefit claims were detected, reflecting the fact that some local authorities started review of NFI matches later than normal due to Covid-19 pressures.

Results

Data sharing enables matches to be made between bodies and across national borders. Data submitted by Welsh bodies for the 2020-21 NFI exercise helped organisations in other parts of the UK to identify 153 cases of fraud and error with outcomes of £183,045.

Process

While the majority of Welsh NFI participants display a strong commitment to counter fraud, 13 of the 22 Welsh local authorities identified 95% of the fraud and error outcomes achieved by the sector. This suggests that some local authorities have either failed to recognise the importance of the exercise or are unwilling to allocate adequate, skilled counter-fraud resources to investigate the NFI matches.

One Welsh local authority, Cardiff Council, agreed to participate in an exercise designed to identify fraud and error in applications for COVID-19 business support grants by verifying applicant bank details and trading status. These checks helped to identify outcomes of just under £0.6 million relating to 41 fraudulent or erroneous applications.

Results

Process

Recommendations

▶ All participants in the NFI exercise should ensure that they maximise the benefits of their participation. They should consider whether it is possible to work more efficiently on the NFI matches by reviewing the guidance section within the NFI secure web application.

▶ Where local auditors recommend improving the timeliness and rigour with which NFI matches are reviewed, NFI participants should take appropriate action.

▶ Audit committees, or equivalent, and officers leading the NFI should review the NFI self-appraisal checklist. This will ensure they are fully informed of their organisation's planning and progress in the 2022-23 NFI exercise.

Outcomes

Key messages

NFI outcomes

Outcomes

Results

Process

NFI is a counter-fraud exercise across the UK public sector which aims to prevent and detect fraud. NFI uses data sharing and matching to help confirm that services are provided to the correct people.

An NFI outcome describes the overall amounts for fraud, overpayments and error that are detected by the NFI exercise and an estimate of future losses that it prevents.

The NFI recorded outcomes of £6.5 million in 2020-21.

Process

Trends in outcomes

Outcomes in Wales have decreased by £1.5 million to £6.5 million in the 2020-21 exercise. Reasons for the decrease in outcomes include:

- the number of fraudulent or erroneous claims for Council Tax Single Persons Discount detected fell from 3,939 in the 2018-19 exercise to 1,987 in the 2020-21 exercise, resulting in outcomes in this area reducing by £2 million; and
- the number of fraudulent or erroneous claims for Housing Benefit detected fell from 179 in the 2018-19 exercise to 82 cases in the 2020-21 exercise, resulting in outcomes in this area reducing by £0.6 million.

The above fall in outcomes was offset in part by:

- an increase in the number of fraudulent or erroneous applications for social housing detected from 74 in the 2018-19 exercise to 237 in the 2020-21 exercise, resulting in increased outcomes of £0.6 million; and
- the detection of 43 fraudulent or erroneous claims for COVID-19 business support grants resulting in cumulative outcomes of £0.6 million.

Outcomes of £6.5 million were identified in the 2020-21 exercise

While overall outcomes have fallen, this is in part because many NFI participants started review of NFI matches later than normal due to work pressures arising from the COVID-19 pandemic.

The only UK nation which saw an increase in 2020-21 NFI outcomes was England. This increase was due to a significant increase in pension outcomes from matching UK-wide pension scheme data.

Late savings arising from NFI 2020-21 will be reported as part of the NFI 2022-23 exercise.

How the latest outcomes compare to the last exercise

Key messages**Seven areas generated almost 98% of outcomes**

The areas which generated the most outcomes from the current exercise are as follows:

Outcomes**Results**

Category	£	Cases
Council tax discounts	£2.6m	1,987
Blue badges	£1.4m	2,717
Housing waiting lists	£0.8m	237
Housing benefit	£0.6m	84
COVID-19 business support grants	£0.6m	43
Council tax reduction scheme	£0.2m	214
Creditor payments	£0.1m	9

Process

Once overpayments have been identified, public bodies can take appropriate action to recover the money. As at 31 March 2022, 81% of overpayments had been recovered or were in the process of being recovered.

Results

Key messages

Council tax discounts

Outcomes

People living on their own, or with no countable adults in the same household, are eligible for a 25% single person discount (SPD) on their annual council tax bill.

Council tax SPD data is matched to electoral register data to help find where people are receiving the discount, but are not the only countable adult at their residence.

The 2020-21 NFI exercise found that the total council tax discount incorrectly awarded across Welsh local authorities totalled £2.6 million. This is an average outcome of £1,305 for each case (£1,003 per case in the 2018-19 NFI). Review of the NFI matches led to the cancellation of 1,987 SPD claims.

Results

Process

While the number of fraudulent or erroneous SPD claims detected fell from 3,939 to 1,987 in the current exercise, this is partly due to investigation of the matches being delayed due to the COVID-19 pandemic. Many claims have been cancelled since the cut-off date for reporting the NFI 2020-21 exercise and these 'late results' will be reported within NFI 2022-23.

Outcomes of **£2.6 million** in 2020-21

Process

Pensions

The NFI provides local authorities that administer pensions with an efficient and effective way of checking that they are only paying people who are alive.

The exercise found nine instances where pensions had remained in payment after pensioners had died compared to ten cases in NFI 2018-19.

In total, pensions outcomes for the 2020-21 NFI exercise are £0.073 million.

This is a reduction of £0.26 million from the 2018-19 NFI exercise, and reflects the continuing impact of the 'tell us once' reporting process which is ensuring that local authorities become aware of the decease of pensioners earlier. While the number of cases detected by NFI has remained almost unchanged from NFI 2018-19, the average value of each case has fallen from £26,396 to £8,160, because the period of time pensions remained in payment after pensioners' death was shorter.

Outcomes of **£0.073 million** in 2020-21

Key messages

Housing benefit

Outcomes

Results

Process

The NFI provides local authorities and the Department for Work and Pensions (DWP) with the opportunity to identify a wide range of benefit frauds and errors.

Housing benefit data is matched to student loans, payroll, pensions, housing benefit, housing tenants, licences, deceased person and Amberhill* data to help identify ineligible claims.

The value and number of housing benefit cases recorded with overpayments has reduced from £1.2 million (179 cases) in the 2018-19 exercise to £0.6 million (82 cases) in the 2020-21 exercise.

The fall in housing benefit cases outcomes is mainly due to matches between housing benefit and payroll and pension payments not being included in the 2020-21 exercise. These matches historically identified significant outcomes. These matches were not included as similar data matching is undertaken by the DWP's Verify Earnings and Pensions (VEP) Alerts service which identifies discrepancies between payroll and pension details held by HM Revenue & Customs and council benefits services. Alerts from VEP are sent to local authorities to investigate discrepancies.

*Amberhill is a system used by the Metropolitan Police to authenticate documents presented for identity.

Outcomes of £0.6 million in 2020-21

The majority of fraudulent and erroneous claims for housing benefit detected by local authorities in the 2020-21 exercise related to students who were in receipt of housing benefit when not entitled.

Process

Case Study: Housing benefit

Carmarthenshire County Council

The Council continues to recognise the value of NFI in protecting the public purse against the threat of fraud risks and considers NFI as being invaluable in the detection and prevention of fraud. The NFI 2020-21 exercise identified 33 housing benefit to student loan matches and of these 13 were high risk matches. Historically the Council has achieved significant results from this specific report and, as in previous exercises, extended the checking process to all matches. Review of the report identified fraud in 30% of the matches, where it was established that benefit customers had failed to declare they were in receipt of student finance/loans. These ten investigations identified overpayments of benefits in excess of £33,000. The Council has recovered the overpayments or remains in the process of full recovery.

Key messages

Blue badges

Outcomes

The blue badge parking scheme allows people with mobility problems to park for free at on-street parking meters, in pay and display bays, in designated blue badge spaces, and on single or double yellow lines in certain circumstances.

Blue badge data is matched to deceased persons and Amberhill data.

Badges are sometimes used or renewed improperly by people after the badge holder has died. It is an offence for an unauthorised person to use a blue badge.

NFI 2020-21 resulted in the cancellation of 2,717 blue badges in Wales. The number of badges cancelled has increased in each NFI exercise since NFI 2012-13. The estimated value of these cases is £1.4 million based on a calculation of the annual estimated cost of lost parking revenue and the likelihood of these blue badges being misused.

The increase in outcomes is due to a growing recognition of the need to prevent misuse of blue badges. Not only does such misuse reduce parking revenues, it also limits the parking facilities available to genuine blue badge holders.

2,717 outcomes in NFI 2020-21

Key messages

Outcomes

Results

Process

Housing waiting lists

NFI uses housing waiting list data to identify possible cases of waiting list fraud. This happens when an individual has registered on the waiting list but there are possible undisclosed changes in circumstances or false information has been provided. This was a new data set for the 2016-17 NFI exercise.

Housing waiting list data is matched to waiting list, housing benefit, housing tenants, deceased persons and Amberhill data.

Local authorities identified 237 cases where applicants were removed from waiting lists compared to 74 cases in 2018-19.

The estimated value of these cases is just under £0.8 million based on a calculation of the annual estimated cost of housing a family in temporary accommodation and the likelihood a waiting list applicant would be provided with a property.

The increase in the number of applications cancelled is due to increased efforts by local authorities to review the NFI matches thereby helping ensure that social housing is only provided to eligible persons.

Number of applicants removed from housing waiting lists

Key messages

Outcomes

Results

Process

Creditor payments

The NFI provides an efficient way to check for duplicate payments and that payments are only made to appropriate creditors.

Creditor payment data is also matched to payroll and Companies House data to help identify undisclosed staff interests in suppliers.

NFI 2020-21 resulted in 54 creditor payment outcomes totalling just over £0.1 million compared to 53 outcomes totalling just under £0.1 million in NFI 2018-19. Recovery action has already taken place or is in process for all of these overpayments.

Creditor payment outcomes have reduced over NFI exercises as participating bodies have improved their internal control systems.

Outcomes of **£0.1 million** in 2020-21

Key messages

Council tax reduction

Outcomes

Council tax reduction helps those on low incomes to pay their council tax bills.

The NFI provides local authorities with the opportunity to identify a range of council tax reduction frauds and errors.

Council tax reduction data is matched to council tax reduction, payroll, pensions payroll, housing benefits, housing tenants, licences, deceased persons and Amberhill data.

The 2016-17 NFI was the first time council tax reduction data sets were included within the NFI.

Outcomes of £0.21 million were identified in the 2020-21 NFI and claims for council tax reduction were amended or cancelled in 214 cases.

The average value of each case was £1,015 compared to £1,457 in NFI 2018-19 suggesting that fraud and error is being identified earlier.

Case study: Vale of Glamorgan Council

The Council has a proactive and comprehensive approach to reviewing all NFI matches. All council tax reduction matches are reviewed by the Investigation Officer against the Council's internal systems to try and establish the current household status of claimants. One such match appeared to show the claimant had not declared an occupational pension that had been in payment since 2018. The Investigation Officer advised the Benefits Team that further investigation was required. The Benefits Team liaised with the Revenues Team and found there was another person residing at the address who was also in receipt of an undeclared occupational pension and who had received a substantial lump sum pension payment in 2018. Despite numerous attempts to verify the current situation with the claimant, the claimant failed to respond. The Council has cancelled the claim and the claimant has agreed to repay an overclaim of £4,775 in monthly instalments.

Process

Use of HMRC Data in NFI

In NFI 2020-21, for the first time, Welsh NFI matches were enriched by HMRC data provided under the provisions of the Digital Economy Act 2017. The HMRC data is proving highly effective in helping to identify applicants who have claimed means-tested benefits and discounts but have not declared income that should have been declared on their applications.

Case Study: Denbighshire County Council

The Council proactively reviewed matches between Council Tax Reduction Scheme (CTRS) and HMRC's household composition. One match suggested there was an undeclared non-dependant in the household from 2017, so benefit payments were suspended. The Benefits Team had previously been notified that the person had left the household in March 2017. On investigation, the customer confirmed the failure to declare the non-dependant since May 2017. The NFI match showed the earnings of the non-dependant to be around the threshold at which the highest deduction to the claimant's benefits would apply, so in the absence of further evidence of the non-dependant's income, the is highest deduction was applied. This resulted in an overclaim totalling £20,782. The Council is in the process of recovering the overclaim.

Process

COVID-19 business support grants

In response to the COVID-19 pandemic, the Welsh Government put in place a package of measures to support businesses through the crisis. One of these measures included providing grant funding through Welsh local authorities to some retail, hospitality and leisure businesses and to businesses classified as small businesses for business rate purposes. NFI matched these grants to ensure that businesses were not inappropriately claiming multiple grants and that grants were not being awarded to known fraudsters. These checks only identified two cases of fraud and error amounting to £20,000, providing assurance that these practices were not common.

NFI also made optional tools available to local authorities to confirm that grant applicants were actively trading before the COVID-19 pandemic, and that bank account details provided by applicants related to legitimate business accounts. One Welsh local authority, Cardiff Council, used these tools in conjunction with other internal controls to identify 41 cases of fraud and error with a value of £575,000.

Case Study: Cardiff Council

Following the use of various upfront application and payment controls, the Council used a multi-layered approach to post payment verification and assurance processes for COVID-19 business support grants. NFI provided a useful source of intelligence as part of these post payment checks. The Corporate Fraud Investigation Team and colleagues in Business Rates used a range of investigative techniques and identified £575,000 of payments for recovery. For example, one NFI match indicated that a company had ceased trading, online enquiries suggested the business had closed and a Companies House check showed the company had dissolved prior to the grant eligibility date. The company had not notified the Council that they had ceased trading and were not eligible for the grant. The Council has recovered, or is seeking to recover the overclaims wherever there is a realistic chance of doing so.

Key messages**Payments to residential care homes****Outcomes**

In previous NFI exercises, NFI has matched residential care home data to deceased persons to identify cases where a care home resident has died, but the local authority has not been notified and so has continued to make payments to the care home.

In NFI 2018-19, 11 cases of overpayments were identified where Welsh local authorities were continuing to pay care homes for residents who had died. The average value of these cases was £14,545.

Results**Process**

Due to the unintended consequence of a change to legislation affecting Wales, Scotland and England, it was not possible to undertake matching in this area as part of NFI 2020-21. The Auditor General is working with the Cabinet Office and Audit Scotland to find a legislative solution that will allow this matching to be undertaken in future NFI exercises.

Key messages

Matches benefiting other public bodies

Outcomes

One key benefit of a UK-wide data matching exercise is that it enables matches to be made between bodies and across national borders. Data provided by Welsh participants for the 2020-21 NFI exercise helped other public bodies outside Wales identify outcomes worth just over £183,000.

Most of these outcomes relate to housing benefits, housing waiting lists, and council tax reductions. For example, payroll data from a health board may allow a local authority to identify a housing benefit overpayment.

For those public bodies taking part in the NFI which may not always identify significant outcomes from their own matches, it is important to appreciate that providing their data can help other bodies and sectors identify frauds and overpayments.

Process

The NFI is a counter-fraud exercise across the UK public sector which aims to prevent and detect fraud. The Auditor General, Cabinet Office, Audit Scotland, and the Northern Ireland Audit Office lead the exercise in Wales, England, Scotland, and Northern Ireland, respectively. The NFI takes place biennially and enables public bodies to use computer data matching techniques to detect fraud and error.

The main purpose of the NFI is to ensure funds and services are provided to the correct people, but the NFI can also identify individuals entitled to additional services or payments eg housing benefit matches may identify customers entitled to council tax discount or reduction.

We carry out the NFI process under powers in the Public Audit (Wales) Act 2004. It is important for all parties involved that this exercise is properly controlled and data handled in accordance with the law. The Auditor General's [Code of Data Matching Practice](#) summarises the key legislation, and controls governing the NFI data matching exercise.

In Wales, the Auditor General has mandated unitary local authorities and NHS bodies to participate in the NFI. The Welsh Government, some Welsh Government Sponsored Bodies, and Audit Wales participate on a voluntary basis.

Key messages**How bodies work with the NFI****Outcomes**

The success of the NFI is dependent on the proactivity and effectiveness of participant bodies in investigating the data matches.

Most participating Welsh public bodies managed their roles in the 2020-21 NFI exercise well.

Results

However, some bodies could be far more pro-active in their approach to the NFI. In particular, some local authorities reviewed very few of the matches they received, and as a consequence did not do sufficient work to address potential frauds. This was due to some participants failing to recognise the importance of the exercise and/or an unwillingness to allocate adequate, skilled counter-fraud resources to investigate the NFI matches.

Process

Key messages**Outcomes****Results****Process****Future developments**

- The Auditor General is considering how to further develop the scope of NFI in Wales and areas of potential data-matching currently being explored include, housing tenancies, GP patient registration, business rates.
- The 2022-23 NFI is now underway. Data sets have been reviewed following a period of consultation and NFI participants are starting to submit data for matching.
- The Auditor General continues to work with the Welsh Government to promote and enhance participation in the NFI across Wales.

The Auditor General is independent of the Senedd and government. He examines and certifies the accounts of the Welsh Government and its sponsored and related public bodies, including NHS bodies. He also has the power to report to the Senedd on the economy, efficiency and effectiveness with which those organisations have used, and may improve the use of, their resources in discharging their functions.

The Auditor General also audits local government bodies in Wales, conducts local government value for money studies and inspects for compliance with the requirements of the Local Government (Wales) Measure 2009.

The Auditor General undertakes the National Fraud Initiative in Wales under Part 3A of the Public Audit (Wales) Act 2004 which empowers him to conduct data matching exercises for the purpose of assisting in the prevention and detection of fraud in or with respect to Wales and to publish the results of any such exercise.

The Auditor General undertakes his work using staff and other resources provided by the Wales Audit Office, which is a statutory board established for that purpose and to monitor and advise the Auditor General.

© Auditor General for Wales 2022

Audit Wales is the umbrella brand of the Auditor General for Wales and the Wales Audit Office, which are each separate legal entities with their own legal functions. Audit Wales is not itself a legal entity. While the Auditor General has the auditing and reporting functions described above, the Wales Audit Office's main functions are to provide staff and to monitor and advise the Auditor General.
