PLANNING, PERFORMANCE & FINANCE COMMITTEE

ELECTIVE CARE RECOVERY PORTFOLIO

Date of meeting	21/12/2021
------------------------	------------

FOI Status	Open/Public
-------------------	-------------

If closed please indicate reason	Choose an item.
---	-----------------

Prepared by	Nicky Croxon, Interim Director Elective Care Recovery
--------------------	---

Presented by	Gareth Robinson, COO
---------------------	----------------------

Approving Executive Sponsor	Chief Operating Officer (COO, DPCMH)
------------------------------------	--------------------------------------

Report purpose	FOR NOTING
-----------------------	------------

Engagement (internal/external) undertaken to date (including receipt/consideration at Committee/group)

Committee/Group/Individuals	Date	Outcome
(Insert Name)	(DD/MM/YYYY)	Choose an item.

ACRONYMS

OPD	Out Patients Department
WLI	Waiting List Initiative
GP	General Practitioner (Primary Care)
CQC	Care Quality Commission
OMFS	Oral and Maxillofacial Surgery
FIT	Faecal Immunochemistry Test
SOS	See On Symptoms

PIFU

Patient Initiated Follow Up

1. SITUATION/BACKGROUND

1.1 This paper seeks to provide an update on the overall progress, challenges, risks and operational schemes in relation to the Elective Recovery Portfolio of work.

2. SPECIFIC MATTERS FOR CONSIDERATION BY THIS MEETING

General update

2.1 The latest quarterly position relating to activity and finance was submitted to Welsh Government at the beginning of November 2021. As can be seen from the table below, the forecast and actual positions for additional activity vary considerably. It is clear that some schemes are delivering activity benefits; however, some schemes have been slow to start, on the whole, due to recruitment of key personnel. Others have been impacted due to WLI payment changes over the summer (now resolved). The pace of change for new schemes and variation to existing schemes should not be underestimated. Whilst it is not expected that the activity lost due to the delays will be recovered, other replacement schemes have been generated which will reduce this gap.

			2021/22				
			Q1		Q2		
			Projected	Actual	Projected	Actual	
Elective Inpatient Activity ¹	Total Core Activity		900	1,360	900	1,309	
	Total Additional Activity	Insourcing	0	0	0	0	
		Waiting List Initiatives (WLI)	70	52	841	63	
		Outsourcing	685	128	708	451

		Total Additional Activity		309	309	309	309
		Total Activity		2,640	3,699	3,411	3,821

- 2.2 Financially, The M7 actual costs of £1,267k were in line with the M7 forecast of £1,493k. A number of schemes have under delivered in month, in line with the above commentary relating to activity and financial forecasting assumes recovery in future periods.
- 2.3 It is also important to highlight that the forecasts for M8 and later months are showing a significant step up in costs across most areas of circa £0.5m. This step up must be considered a risk given the Month 7 actuals costs were circa £227k below forecast.

Centralised Working Group for Elective Recovery

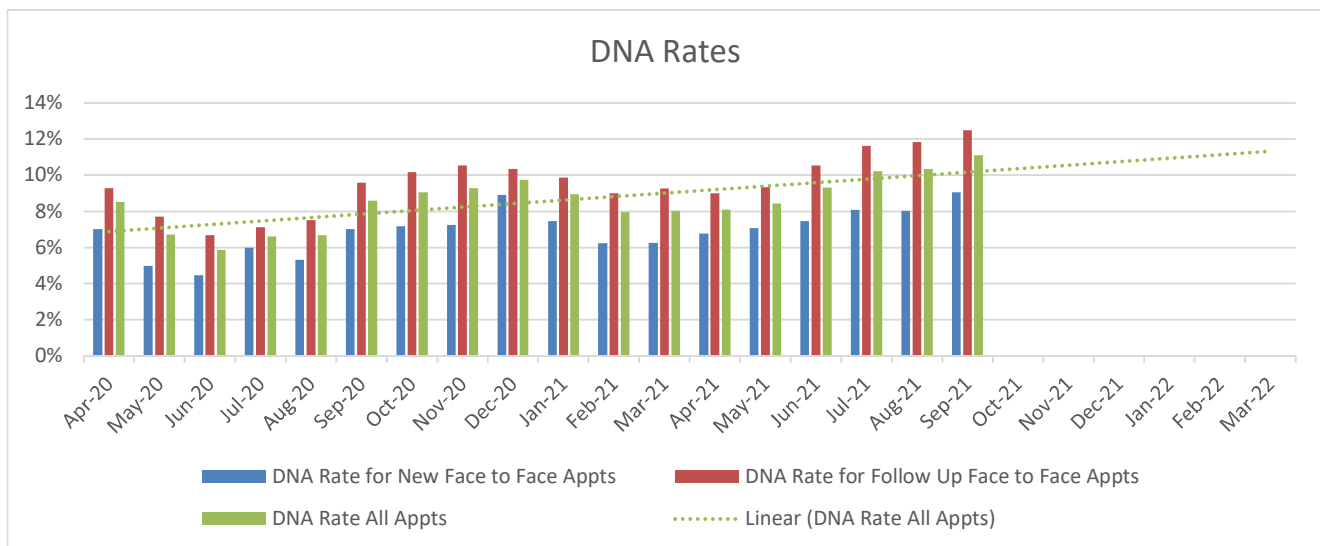

- 2.4 During October 2021, a small Multi-Disciplinary team was formed to rapidly work through issues surrounding elective recovery. The overarching objective of the group is to ensure that equitable access to surgical treatment is achieved, maximising the use of resources across all ILGs.
- 2.5 The initial focus of the team has been on;
- Increasing elective operating for Orthopaedics, specifically;
 - Use of Ward 15 on the Royal Glamorgan Hospital site for prioritised orthopaedic patients across all of Cwm Taf Morgannwg's population
 - Utilising The Royal Gwent facilities; including defining the SLA, agreeing the governance arrangements and operationalising the facility for Cwm Taf Morgannwg University Health Board
 - Delivering and Expanding Elective Ophthalmology surgery on the Prince of Wales site, for CTM wide access
 - Centralising Colorectal surgery at the Royal Glamorgan Hospital, specifically utilising Ward 10/11
 - Standardisation of elective practices across CTM, including Green Pathway management, Pre-operative assessment and Social Distancing guidelines.
- 2.6 Whilst the focus on the above goals remain a priority it is clear that preparatory work is required to achieve these such as standardisation and access to IT systems to support the safe movement of patients between hospital sites.
- 2.7 Progress has been made in relation to both Orthopaedic ambitions, with operating commencing during the week of 7th December 2021. The next phase will see these schemes broaden to include a wider patient cohort; this will mean patients will be offered the opportunity to have their surgery at a hospital, which may not be local to them, much in the same way as outsourcing to the Independent Sector works.

2.8 For clarity, the original schemes forming the Elective Recovery Portfolio are still live and form the basis of the weekly oversight reviews.

Workstream Updates

2.9 Outpatients

- Two pilots on the Welsh Government driven initiative on clinical validation have been completed. Within Dermatology a text message driven validation exercise was conducted with 300 text messages being sent, unfortunately just short of 50% (117 patients) responded with only 25 advising that they wish to be removed from the waiting list. The patients who have not responded will now be followed up with a letter, in line with WG advice if they do not respond to this; they will be placed on a SOS (see on symptom) pathway for 6 months.
- During the pandemic, our local Text and Remind service was switched off. The DNA rate across the Health Board has reached 10% during some months, which inevitably means a huge loss of valuable activity and therefore a process for resetting the reminders is underway – it is expected that this service will be live by December 2021. Furthermore, in an attempt to reduce the non-attendance a campaign has been launched via our communications team to advise patients of their responsibility to attend appointments, encourage attendance and provide some statistics so that vital capacity is not lost.

- A focus on validation has commenced across the stages of a patient pathway; ensuring that where possible patients are discharged, placed on an SOS or PIFU pathway or validated as still requiring treatment. It is expected that an improvement in backlogs will be reported from December 2021.

- The SOS and PIFU project has made progress with three specialties (Gynaecology, ENT and Rheumatology) being set up and ready to increase their patient cohort in this area. The work to date has included engagement and education with the management and clinical groups, amendments to clinic outcome forms (to ensure accurate reporting) and patient correspondence production (in combination with Communications).

2.10 Endoscopy

- Following a short delay, the contract for a Mobile Endoscopy Unit has been signed. This will see the unit on site from January 2022 and following standard estate works the first patients will pass through the unit during March 2022.
- Insourcing is now running at a rate of two lists per weekend, in order to reduce inequity of waiting times across CTM insourcing lists will now take place at the RGH site each weekend. Furthermore, additional lists (in house) have been agreed and have been operational from November.
- Validation of the urgent waiting list (a total of 414 patients) has been undertaken the outcomes of this are below. This demonstrates the importance of the validation; it is now continuing.

Outcome of validation	Total
Colonoscopy required colitis surveillance	14
Colonoscopy required polyps	34
Colonoscopy required urgent	103
CT Colon	2
Discharged	1
Downgraded to Routine	4
FIT	176
OPD Virtual review colorectal	18
OPD Virtual review gastro	41
Upgraded to USC	20
Urgent therapies	1
Grand Total	414

2.11 Primary Care (including Wellbeing Hubs)

- Progress on development of the Wellness Hub is continuing, concerns regarding Information Governance relating to software usage have been overcome and contracts are in the process of being awarded. This will ensure that the wellness coaches are able to track their patient's progress and importantly that the GP will also be able to access this.
- All posts included within the outline proposal have now been recruited to, including additional posts to increase the programmes to include Mental Health

support within Primary Care. A slight delay in recruitment has pushed back their training which will now commence from end of November 2021.

- Spirometry weekend clinics are being trialled and staff are presently being trained in order to undertake this service however, clinics will commence from end of November 2021.
- An emergency dental service commenced in July 2021. The service offers advice and guidance via a phone line (including prescriptions where necessary) and triages access to appointments. This service was introduced to reduce A&E attendances and improve oral health (by reducing delays to treatment) which in turn would assist with a reduced demand on elective services.

2.12 Outsourcing

- Relationships with the Independent Sector (IS) have been developed, however capacity within this setting is limited due to the demand for private healthcare. Furthermore, workforce issues (recruitment, sickness and shielding / Covid-19 related absences) have also impacted on the availability of capacity. This has meant that initial proposals for our patients being treated within the IS have been reduced.
- Data regarding LOS is being reviewed; there is an assumption that the duration that a patient has waited for surgery will impact on their LOS (increase) this has been noted within the IS and has resulted in a pressure on their beds resulting in cancellations of both private and NHS patients. A situation which is unprecedented within the IS.
- A recent mini competition has been undertaken to outsource some of our long waiting (who are triaged as appropriate) patients to a virtual outpatient service and will see them being offered a virtual appointment from January 2022. Cardiology and Respiratory patients within the Merthyr Cynon locality will be the initial focus of the project.
- A second project for outsourcing Dermatology to a virtual provider is being developed, which will conclude at the end of December 2021 and see long waiting dermatology patients (again appropriately triaged), being offered a virtual appointment from February 2022.

2.13 Orthopaedics and Therapies

- Appointments for First Contact Physio have been made and the schemes are up and running across all localities. The AHPs have seen 961 patients since October 2021 with a 0.6% onward conversation rate to the Orthopaedic specialist team.
- A scheme related to escape pain is now operational and we will begin to see this benefit from December 2021.

- Physios are supporting within Urogynae clinics where space is available – however space is very limited and this is affecting the ability to provide more support.

2.14 ILG SCHEMES

- Data charts are produced on a monthly basis to track the activity benefits associated with recovery schemes (these are available on request). The charts demonstrate;
 - Impact on associated backlog positions (i.e. >stage 1 waiters if an outpatient scheme, should show an improvement)
 - Outpatient activity levels (should demonstrate an increase)
 - Demonstrate activity levels versus trajectory of anticipated activity (i.e. said would deliver xx clinics @12 patients per clinic, at 2 per month and have delivered xx)

3. KEY RISKS/MATTERS FOR ESCALATION TO BOARD/COMMITTEE

- 3.1 Outpatient space is a theme across all workstreams within the centralised team our efforts have been focussed on theatres, however – focus will move to outpatients over the coming weeks.
- 3.2 The unpredictable nature of Covid-19 and moving into winter should be considered a key risk for delivery of increased elective activity on an acute site.
- 3.3 Support with bed modelling is required to ensure that plans made for future services being temporarily accommodated are robust.

4. IMPACT ASSESSMENT

Quality/Safety/Patient Experience implications	Yes (Please see detail below)
	Long waiting times and backlogs in care delivery may lead to an increase in mortality and reductions in quality of life. Patient experience will be affected by the increased waiting times.
Related Health and Care standard(s)	Governance, Leadership and Accountability
	If more than one Healthcare Standard applies please list below:

Equality Impact Assessment (EIA) completed - Please note EIAs are required for <u>all</u> new, changed or withdrawn policies and services.	Yes
Legal implications / impact	There are no specific legal implications related to the activity outlined in this report.
Resource (Capital/Revenue £/Workforce) implications / Impact	Yes (Include further detail below)
	Details of workforce implications are available from within the detail of the schemes (there are multiple).
Link to Strategic Goals	Improving Care

5. RECOMMENDATION

5.1 The Committee are asked to **NOTE** the contents of this update report.
