

## **Freedom of Information Request: Our Reference CTHB\_398\_16**

### **You asked:**

Would it be possible to get access to retrospective ENT consultant job advertisements which were posted from UK hospitals on the NHS jobs website from January to November 2016 inclusive, please? I am just looking at the posts which were available with regards if they were full-time/part-time, permanent/locum, and whether they included a subspecialty, and comparing the results with a survey of newly appointed consultants (which I have already performed) to determine the main factors which influenced applicants' choice of consultant post.

### **Our response:**

The attached spreadsheet contains the required information for vacancies published between 01/01/2016 and 30/11/2016 where the job title field contains both 'Consultant' and 'ENT' or where the job title is just 'Consultant' but the specialty or department field contains 'ENT'.

NHS Jobs does not capture 'sub specialty' information. Therefore, we are unable to provide this element of the request.
