

## **Freedom of Information Request: Our Reference CTHB\_434\_17**

### **You asked:**

Please can you provide the total cost to the health authority in undertaking a double hip replacement.

Also the cost of after care?

### **Our response:**

Double hip replacement is not a standard procedure and would only be carried out following an emergency traumatic event. Unfortunately, this is not easily identifiable and as it happens on rare occasions, it is not possible to calculate and provide a standard procedure cost.

With regards to the cost of after care, this would vary from patient to patient and therefore again is not possible to calculate.
