

Freedom of Information Request: Our Reference CTHB_09_17

You asked:

The number of patients waiting for an ophthalmology follow-up appointment who are delayed past their target date (latest figures available – please just indicate what date/period the figures relate to).

(I already have information on numbers of people waiting for a follow-up appointment, it's the number of these people delayed past their clinically determined target date for follow-up I'm after). It's my understanding that this information is now collected by Health Boards under the Planned Care Programme.)

Our response:

The information that you require is reported to the Health Boards Finance Performance and Workforce Committee (agenda item 4.5) (p234). As these papers are published on our website and are accessible via the public domain we have applied Section 21 "Information accessible by other means". Please see link provided below.
