

Freedom of Information Request: Our Reference CTHB_235_17

You asked:

Could you please provide me with the figures for the following questions, for all years that data is available?

1. How many referrals have been made to the designated gatekeeper as part of the CP21 care pathway for gender dysphoria?
2. How many patients have been refused further referral on the pathway by the gatekeeper?
3. How many of those patients appealed the refusal?
4. How many of those appeals were successful?

Our response:

Cwm Taf University Health Board has data available from January 2015 to date. I can confirm that during that time period, 40 referrals have been made and no patients have been refused further referral.
