

Freedom of Information Request: Our Reference CTHB_187_17

You asked:

I am writing to you today to request information relating to the treatment of schizophrenia by long acting depot injections/treatments.

1. Within your organisation how many patients are currently [within the past 6 months] being treated for Schizophrenia (ICD code: F20)?

Please note the Health Board only records this information at an inpatient level and where data is reliant on clinical coding, this traditionally has a completion timeline of three months in arrears – therefore the data will be incomplete.

I can confirm that between 01/12/2016 – 31/05/2017 there have been 51 inpatient episodes with a primary diagnosis of schizophrenia (ICD10: F20, pos: 1, episodes no: 1).

2. Of these patients, how many are currently [within the past 6 months] being treated with the following long acting depot therapies for Schizophrenia (ICD code: F20):

Name of Long Acting Injection Depot Drug
Olanzapine pamoate (Zypadhera)
Risperidone LAI (Risperdal Consta)
Aripiprazole LAI (Abilify Maintena)
Paliperidone palmitate, once monthly (Xeplion)
Paliperidone palmitate, three monthly (Trevicta)
Zuclopenthixol decanoate (Clopixol)
Pipothiazine palmitate (Piportil)
Fluphenazine decanoate (Modecate)
Haloperidol decanoate (Haldol Decanoate)
Flupentixol decanoate (Depixol)

Our pharmacy system does not record this information by number of patients treated. However, we are able to provide the number of items issued (please see attachment 1).
