

Freedom of Information Request: Our Reference CTHB_242_18

You asked:

Could I please request the following information? The total amount of money contributed towards health resources in the Cwm Taf University Health Board area in the last financial year. That would be health equipment and new medical units that are part funded by charitable contributions. What does this represent as a percentage of the total expenditure on resources

Our response:

During the financial year 2017-18, the UHB received total contributions of £0.248m (£0.235m revenue + £0.013m capital) from the Cwm Taf NHS Charitable Funds for medical equipment.

This represents 0.04% of the total expenditure (revenue + capital) charged against resources.
