

Freedom of Information Request: Our Reference CTHB_25_19

You asked:

I would like to know the following information under the freedom of information act:

- How many fax machines are still in use by the health board?

We estimate that there are currently around 260 devices throughout the organisation. Whilst we do replace broken fax machines as required, it is very rare that additional units are rolled out.

Please detail in what department the fax machines are used in.

Every department and directorate across Cwm Taf has access to a Fax machine. That means that every department either has a Fax machine, or they can readily access one close by.
