

Freedom of Information Request: Our Reference CTMUHB_248_20

You asked:

1) Are you commissioning post-covid services:

a) in hospital

OR

b) in the community?

To clarify:

- *I mean 'post-covid services' defined as services designed to treat patients with covid-19 who were *not* hospitalised with the virus and who have *not* necessarily had a positive test for covid-19.*
- *I mean 'commissioning' defined as planning, providing, and/ or funding clinical services designed to specifically treat the health needs of the cohort of patients defined above.*

2) Can you describe these services?

To clarify:

- *please provide information about any speciality treatment being provided for the cohort of patients as defined above.*

3) How much have you spent on these services?

4) How many patients have accessed your post-covid services?

Our response:

The Health Board is not specifically commissioning post COVID services in the way you describe. However, we do commission and provide services according to a patient's needs, where any patient post COVID can access those generic services available, according to their clinical need.
