

Freedom of Information Request: Our Reference CTMUHB_423_20

You asked:

Please can you help with my request.

Due to information not being reported correctly or data inaccurate on the covid deaths. I am looking into finding out the exact deaths so I can make informed decisions going forward.

Please is it possible to have the numbers of death rates of covid 19 only without the any Heath conditions from February 2020 to Sept 2020.

Also from October to now please.

As you are aware under freedom information act on request you should be able to forward this accurate information to me.

Our response:

There were 361 Cwm Taf Morgannwg University Health Board resident deaths, between 1 February 2020 and 30 September 2020, where the underlying cause was Covid-19.

There were a further 149 Cwm Taf Morgannwg University Health Board resident deaths, since 1 October 2020 where the underlying cause was Covid-19.

This information was sourced from the NWIS Data Warehouse view of ONS Deaths data for Welsh Residents. Please note that there can be a time lag in between a death and the codified reporting of it via the ONS Dataset (the latest death that shows up in the data was 6 November 2020).
