

Freedom of Information Request: Our Reference CTMUHB_282_20

You asked:

Please could you tell me what the protocol is for abortion counselling services in your health board? Is it through BPAS clinics that patients are able to access counselling? Or are patients advised to seek counselling through their GPs/other routes? In addition, is counselling available pre- and post-abortion?

Our response:

At the present time the service that we offer is counselling through BPAS who provide three hourly sessions, on receipt of our referral. BPAS counselling is available pre- and post-abortion.
