

Freedom of Information Request: Our Reference CTMUHB_400_22

You asked:

I would like to know how many people have died while waiting over two years for a procedure.

Just to clarify, I don't mean "outpatient appointment". The people I am looking for are those "referred for treatment with the pathway still open when they died".

For example, if a person had waited 2.5 years for a hip replacement, and then had died before the procedure had taken place they would be included. However if a person had waited under two years, they would not be included.

How many people have died waiting over two years for a procedure?

I would like the data broken down by year for the years:

2016

2017

2018

2019

2020

2021

2022 (up to most recent data).

Our response:

Please note that Cwm Taf Morgannwg University Health Board was established on 1 April 2019. Therefore due to the timeframe requested, the information prior to this may not reflect the boundary change (include the Bridgend area).

Please see provided in the table below the number people that have died while waiting over two years for a procedure.

Year	Number
2016	24
2017	27
2018	34
2019	56
2020	73
2021	100
2022 to date	100
