

Freedom of Information Request: Our Reference CTMUHB_217_23

You asked:

Can you please confirm that you are currently undertaking screening and separately confirm that Diva assessments are taking place for adult residents of the Rhondda Valley?

If someone from the Rhondda joined the ADHD assessment process in January 2023 and had undertaken initial screen with a mental health practitioner for onward forwarding to a consultant, when can they expect the assessment to take place based on current forecasts?

Our response:

We can confirm that screening for adult residents of the Rhondda Valley are being undertaken and DIVA assessments are also being carried out.

The current waiting time for someone from the Rhondda who was referred in January for an ADHD assessment, is 9-12 months.
