

Freedom of Information Request: Our Reference CTMUHB_222_23

You asked:

In April 2019 "Implementing a timed oesophago-gastric cancer diagnostic pathway" was published. This showed a chart with the 28 Day pathway.

If applicable to your Hospital please can you advise me if this has been implemented yet and if so the date it was first applied.

Our response:

The oesophago-gastric cancer diagnostic pathway you refer to is applicable to NHS England. In Wales, we are working toward the suspected cancer pathway, national optimal pathways. There are separate ones for oesophageal and gastric cancers and their timelines differ from this one, so would not be applicable.
