Freedom of Information Request: Our Reference CTMUHB_378_24

Clarification provided 25/07:

This is for 14 year olds.

You asked:

- 1. Please provide the current waiting time for Children (14 years of age) who are to be assessed for ADHD and have been referred for assessment by their doctor and school to CTM.**

We can confirm that we currently have 92 young people on our waiting list at the moment who are 14 years old and awaiting an ADHD assessment. Our longest waiting time for this cohort is 94 weeks (21.5 months).

- 2. Please provide the current waiting time for Children (14 years of age) who have yet to be assessed by initial referral to a doctor for onward referral to CTM for narcissistic personality disorder (NPD).**

The Health Board does not hold this information.

- 3. Please provide details of the treatment path for children who may be showing symptoms of NPD.**

We do not have a treatment path for children. NPD would not normally be diagnosed until adulthood.
