The University Health Board accepts that there is a public interest in ensuring openness and transparency however, the Health Board believes that disclosure of information in a manner which fails to protect the interests and relationships arising in a commercial context could have the effect of discouraging companies from dealing with the Health Board because of fears that the disclosure of information could damage them commercially. In turn this could then jeopardise the Health Boards ability to compete fairly and pursue its function to bring forward development in the area and obtain value for money.
