Freedom of Information Request: Our Reference CTMUHB_298_24

You asked:

With regards to response CTMUHB_231_24 - I notice that all of this information is in relation to the existing quarry operations - due to end in 2028.

Was there any specific information requested or provided in relation to the Western Quarry expansion not due to end until 2047 - this encroaches further on homes , removes the community's green space (critical for mental and general health) and comes within 165 meters of a school?

I think there is more information that needs to be provided. This (CTMUHB_231_24) only relates to the existing quarry - there is a reference in the letter to information provided in relation to the proposed quarry extension (see letter 12 August 2021) - can you please provide details of all communication related to the proposed extension.

Our response:

The information that was sent in response to your initial FOI request (CTMUHB_231_24) includes the most recent correspondence. There has been no further correspondence from the health board with respect to an expansion of the quarry to 2047.

Any comments that have been provided on planning applications can be found in the public domain with other relevant planning documents held on record by the relevant council.
