Freedom of Information Request: Our Reference CTMUHB_249_26

You asked:

I am hoping you can help me understand the prostate screening data available in Wales please.

I have contacted DHCW for the PSA blood tests in LIMS (WRRS) data, but I understand DHCW do not have the permission to share the data and have instead directed us to approach each health board. Therefore, I am contacting you to see what data you hold in relation to prostate screening.

We do not need any patient-level data. We are keen to understand the number of prostate screening appointments that take place each year (last 5 years) across Wales and particularly in 45-61 year old men.

Is this something you can help with for your health board, and would you be able to share the data with us please?

Our response:

We can confirm that the Health Board does not hold the number of screening appointments, as these are primarily arranged/issued by GPs.

However, please see provided in the table below, data held by the Health Board on the total number of PSA tests for each of the last 5 years (age 45-61). Noting the test numbers do not reflect the number of "prostate screening appointments".

Count of Visit Number	
	Total
Year of Receipt	
2021	2580
2022	3427
2023	3665
2024	4120
2025	4289
Total	18081
